User Base

- free access with college ID
- College students in campus dorm
- Fixx Maintanence
- UofSC housing
- Resident Mentors
- Developers (us)
- fixxers are assigned to their specified abilities

App Design

- Constantly Updating
- knowing who else is on the waitlist
- display the wait time
- Map the residential halls on campus
- Availability of fixxers
- Accessibility on Android/iPhone
- Grouping clients within close proximity
- App maintanence?
- description of maintenance needed
- Type of issue needing maintanence
- the design of the app?
- app on smart phone

User Interaction

- **Verify the Fixxer**
- Verifying users
- **Report faulty repair**
- Rating system for each Fixxer
- **Fees**
- User-friendly Interface
- Priority of certain demands over others
- Client feedback
- getting repairs in a timely manner
- notifying user that the fixxer is on the way
- live chat with fixxer when close to your time
- notifying user fixxer is there
- the user receives information of the Fixxer for safety reasons

External Considerations

- cooperation with multiple colleges?
- app is connected to college id so repairs can be under insurance
- Working with Fixx
- Keeping records
- **Ability of Fixx to fix it**
- Filtering requests
- external contact for emergency contact
- random people can't see your problems, only fixxers
